IDEP

IDEP has been developing and publishing community education media since 1999. Our publications are community education materials specially designed to help raise awareness, enhance understanding, and encourage action related to key environmental stewardship, disaster management and issues related to sustainable development in local communities. IDEP media use illustrations, images and diagrams appropriate for use in low-literacy environments.

IDEP offers a new range of children and teachers resources as well as an expanded range of audio-visual tools. These exciting games, kids activity books, comics and education videos can help to make some of the complex issues relating to sustainable community development and disaster management more accessible for an even wider audience.

Any of the media listed in this catalogue can be ordered from IDEP's office. Special prices are available for wholesale or large-quantity orders.

Community Based Disaster Management Manual *Community Based Disaster Management Resource Book*

The **Community Based Disaster Management Manual** can be used to prepare for and reduce the impacts of disasters.

Appropriate for **communities and facilitators**. Total **320 pages**. Language: **Indonesian, English**.

Contents of this book:

- The 'Before Disaster' section includes instructions on disaster mapping, pursuing further training and developing a community based disaster management team.
- The 'During Disaster' section includes detailed instructions on what can be done when a disaster occurs to quickly respond to the immediate needs of the community and reduce potential loss of lives. It includes instructions on evacuation procedures and on how to work with disaster management agencies.
- The 'After Disaster' section includes instructions for community impact assessment, soliciting support from donors, monitoring recovery processes and working with disaster management agencies. It includes a full set of easy-to-use tools that are useful during the recovery process.

Author: *Petra Schneider*

The **Community Based Disaster Management Resource Book** contains forms that guide effective disaster management in all 3 stages.

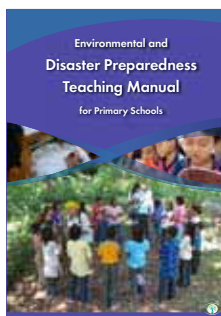

Teacher's Manual for Environmental Education and Disaster Preparedness Primary Level Education

This teacher's handbook provides educators with background information for designing dynamic lesson plans for in-class and outdoor education activities. The manual provides detailed lessons, photocopyable activities and resources, as well as fun activities that function as lesson evaluations for keeping track of student comprehension of the materials delivered.

Appropriate for **Primary Level teachers (classes 4/5/6)**. Total **284 pages**. Language: **Indonesian, English**.

Contents of this book:

- **My sustainable environment:** Increases understanding of how our actions affect the environment with activities that teach how to become stewards for the earth.
- **My healthy environment:** Looks at how we can work with our environment to develop and maintain healthy lifestyles.
- **My safe environment:** Covers the principles and practices of disaster preparedness for local schools including a range of hands-on student's activities.

Author: *Petra Schneider*

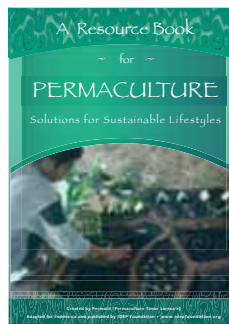

A Resource Book for Permaculture

This reference book contains 13 modules, each of which includes detailed explanations and practical exercises.

Appropriate for **communities** and **facilitators**. Total **354 pages**. Language: **Indonesian, English**.

Contents of this book:

- Permaculture and sustainable community design
- Patterns in nature and methods of design
- Houses, water and waste management
- Healthy soil
- Seed saving and nurseries
- Home and community gardens
- Farming
- Forests, tree crops and bamboo
- Integrated pest management (IPM)
- Animal systems
- Aquaculture
- Appropriate technology
- Cooperatives and enterprise development

Author: Permatil, Ego Lemos, Lachlan McKenzie

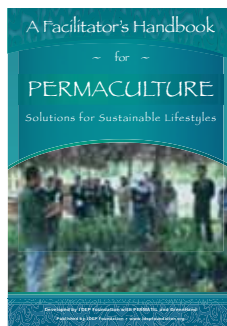

Permaculture Facilitator's Handbook

This handbook works in conjunction with The Resource Book for Permaculture. It includes guidelines and techniques for delivering Permaculture workshops and implementing effective courses appropriate to the needs in your area.

Appropriate for **facilitators**. Total **376 pages**. Language: **Indonesian, English**.

Contents of this book:

- Environmental rehabilitation and sustainability
- Strengthening community resilience and local economies
- Preparations and tools needed for conducting Permaculture courses and lessons
- Over 210 presentations, creative thinking exercises and practical hands-on exercises

Author: Lachlan McKenzie, Petra Schneider

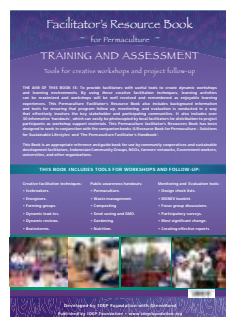

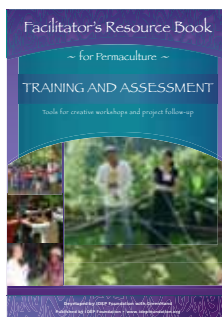

Permaculture Facilitator's Training and Assessment Resources

This resource book provides facilitators with tools to create dynamic workshops and learning environments. It also includes tools for ensuring that program follow up and monitoring and evaluation is conducted in a way that involves the participating communities in an effective way. It also includes over 30 informative handouts, which can be photocopied for distribution to project participants as workshop support materials.

Appropriate for **facilitators**. Total **148 pages**. Language: **Indonesian, English**.

Contents of this book:

- Detailed instructions for conducting pre- and post-training assessments
- Course and community evaluation and follow-up tools
- Preparation tools needed for conducting Permaculture courses and lessons
- Over 210 presentations, creative thinking exercises and practical hands-on exercises

Author: *Petra Schneider*

Community Based Disaster Management Comic Books

These booklets are designed to increase community awareness about specific types of disasters and to encourage community involvement in disaster mitigation and management. These 8 fictional accounts of how communities responded to disasters in their area are an engaging way to introduce community based disaster preparedness. Each comic book includes a fact sheet about the causes of, and appropriate responses to, the specific type of disaster covered in the story.

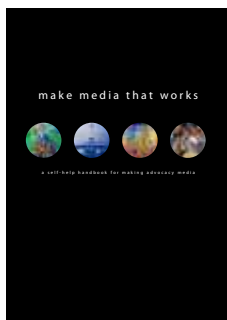

Appropriate for **children aged 9 and above**. Total **16 pages**. Language: **Indonesian, English**.

Titles to choose from:

Volcano, Storm, Tsunami, Building Peace, Flood, Earthquake, Landslide and Terrorism.

Make Media That Works

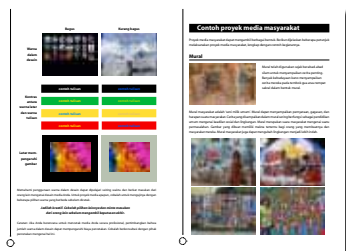

This complete 280-page handbook is a practical handbook for people interested in learning more about the principles of making effective media for campaigning and communications. It offers suggestions for both experienced and inexperienced designers, even if you have never made any media before you will find most of the contents on this book easy to follow and useful. It covers theories of media design, complimented with over 100 simple activities you can do to start exploring media design and development.

Appropriate for **public**. Total **282 pages**. Language: **Indonesian, English**.

Contents of this book:

- An introduction to media design, development, production, planning, distribution and evaluation
- Step-by-step instructions for how to make high-impact educational and public campaigning materials like posters, banners, murals, publications, comics, illustrated fact sheets and T-shirts
- Guidance for making professional communication tools like brochures, flyers, newsletters, advertisements, logos, business cards, letterheads, PowerPoint presentations, websites and blogs
- Basic guidelines and a series of case studies with ideas on how to develop 'community media' as a dynamic process for social development

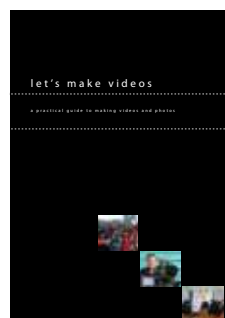

Author: *Petra Schneider*

Let's Make Videos

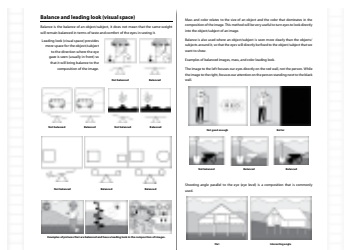

This 100-page filmmaker's guide is a practical handbook for people interested in making documentary and public education films. It is designed for new filmmakers; even if you have never made a film before you will find most of the contents on this book easy to follow and useful. This book provides an introduction to the basic theories of effective filmmaking, as well as principles and practices for making high impact photographs. The handbook is made to be as user friendly as possible, full of images and diagrams that illustrate the principles of great filmmaking.

Appropriate for **public**. Total **94 pages**. Language: **Indonesian, English**.

Contents of this book:

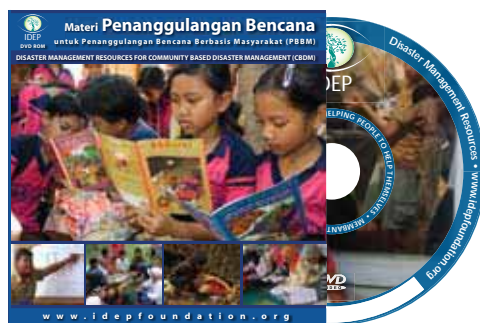

- Introduction to the equipment needed for grass roots filmmakers
- How to use your camera most effectively, including shot composition, lighting, and movements
- The basic principles of documentary film script development and how to conduct effective interviews on camera
- Basic guidelines for film editing on either PC or Macintosh computers
- Working with a team to make films (crew)

Videos & Resources on Disk

Community Based Disaster Management Facilitator Resources DVD

Author: Petra Schneider

This DVD can be used by local facilitators to enhance the effectiveness of trainings and public awareness events about disaster management.

Appropriate for **facilitators**. Language: **Indonesian, English (bilingual)**.

Contents of this DVD:

- A series of five slide shows about CBDM
- Several related documentary videos
- A series of 34 trainers' PowerPoint shows about CBDM
- IDEP's Community Based Disaster Management Toolkit
- IDEP's emergency response publications in PDF format
- A series of related campaigning tools
- CBDM trainer's resources
- Information about IDEP and its CBDM programs

A brief description of the contents on this disk

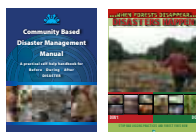

Facilitator's references and resources

Includes IDEP's CBDM Manual, Resource Book and Facilitator's Handbook, as well as key reference documents such as the Indonesian laws for disaster management and other documents related to community based disaster management.

Printable books and posters and fact sheets

Educational comic books and campaigning/public awareness posters that can be printed out, copied and distributed to local communities and other stakeholders in CBDM. These resources can help raise awareness about issues related to community based disaster management and disaster risk reduction.

PowerPoint presentations

Includes over 30 basic PowerPoint presentations. They can be used by local facilitators to deliver presentations, conduct learning sessions and share key information about what communities can do to effectively help themselves before, during and after disasters occur.

Series of slide shows, with photos of CBDM activities

Each of the slide shows in this collection includes a range of photos that show community based disaster management activities on the ground in local communities and schools in Indonesia. Topics covered include disaster management trainings, educational activities for children, emergency response initiatives, community based sustainable disaster recovery and more.

Disaster management films

Includes a wide range of educational and documentary films that can be used to introduce key topics related to community based disaster preparedness, response and recovery to communities, educators, and policy makers. The films are designed to inspire, motivate and demonstrate various activities that can be done at the community level for effective disaster management.

Permaculture Facilitator's Resources DVD

Author: Petra Schneider

This DVD can be used by local facilitators to enhance the effectiveness of trainings and public awareness events about Permaculture.

Appropriate for **facilitators**. Language: **Indonesian, English (bilingual)**.

Contents of this DVD:

- 87 slide shows, containing over 2,200 photos
- Several related documentary videos
- 12 PowerPoint presentations about Permaculture
- IDEP's Permaculture book series in PDF format
- IDEP's What Do You Know About GMO? book
- A series of related campaigning posters
- Resources for program monitoring, evaluation & reporting
- Information about IDEP and its Permaculture programs

A brief description of the contents on this disk

PowerPoint Presentations

Includes 12 detailed PowerPoint presentations that can be used by local facilitators to deliver presentations, conduct learning sessions and share key information about what can be done by local communities to strengthen and develop their resources and environments in a sustainable way.

Permaculture and environmental management films

Includes educational and documentary films that can be used to introduce key topics related to sustainable community development to communities, educators, and policy makers. The films are designed to inspire, motivate and demonstrate various Permaculture activities and advocacy issues that can be introduced at the community level.

Slide shows for teaching Permaculture

This series of over 80 different slides explains the basic principles of Permaculture in community development, and how to implement them. Topics covered include Permaculture design and patterns in nature, sustainable housing, water and waste management, healthy soil, seed saving, home and community gardening, farming, forest management, trees and bamboo, integrated pest management, animal and aquaculture systems, appropriate technology and cooperatives and small enterprises.

Printable books, posters and fact sheets

Manuals, facilitator's handbooks, campaigning/public awareness flip charts and posters that can be printed out, copied and distributed to local communities and other stakeholders. These materials can be used to campaign for, learn about and practice Permaculture and sustainable community development.

Facilitator's references and resources

Includes IDEP's Permaculture facilitator's manuals and other key resources for local facilitators. These materials can be used for planning, documenting and evaluating Permaculture trainings and related community activities.

'Learnsapes' Resources DVD for working with children

Author: Petra Schneider

This DVD can be used by local facilitators to enhance the effectiveness of school activities and public awareness events for children about sustainable development and disaster management.

Appropriate for **facilitators**. Language: **Indonesian, English (bilingual)**.

Contents of this DVD:

- 7 slide shows, with photos of learnsapes activities
- Several educational videos appropriate for children
- A series of related campaign posters and fact sheets
- Related children's activities (games and activity books)
- Children's books about the environment and disasters
- Information about IDEP

A brief description of the contents on this disk

Teacher and educator resources

A wide range of easy-to-follow and adapt teacher's resources covering topics related to environmental management, eco-literacy and disaster risk reduction. These resources can help with developing and delivering dynamic lesson plans for in-class and outdoor education activities. It includes detailed lessons, photocopyable resources, and fun activities that function as lesson evaluations for keeping track of student comprehension of the materials delivered.

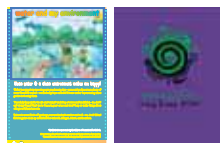

A range of educational videos appropriate for children

A wide range of fascinating, child-friendly educational films that support environmental education, sustainable community development and disaster risk reduction. The DVD ROM also includes documentary films showing examples of local children doing a range of related activities.

Printable activities for kids

Educational games and activity sheets that can be used directly by children and their educators to introduce, explore and learn about issues related to environmental education, sustainable community development and disaster risk reduction. It includes printable activity sheets, fact sheets for projects to do at school or home.

Books and posters for children

Educational comic books and campaigning/public awareness posters designed by and made for children to explore and learn about issues related to environmental education, sustainable community development and disaster risk reduction. It includes printable samples of each item for learning at school or at home.

Series of slide shows, with photos of Learnsapes activities

Each of the slide shows in this collection includes a range of photos that show 'Learnsapes' activities on the ground in local schools in Indonesia. Topics covered include gardening, waste management, learning with animals, disaster education and more.

Let's Get Prepared, Films about Community Based Disaster Management

Creator: Oxfam GB, SurfAid

Educational Community Based Disaster Management (CBDM) videos that can help local communities and decision makers to gain a better understanding of the key concepts of effective CBDM and inspire people to start CBDM activities in their areas.

Appropriate for **public, facilitators**. Language: **Indonesian, English** text. Total duration: **67 minutes**. Available on **DVD or VCD**.

Contents of this DVD/VCD:

- What is Community Based Disaster Management?
- Disaster Management Group
- Preparedness Planning
- Basic Emergency First Aid Techniques

A brief description of the films on this disk

What is Community Based Disaster Management? (17 minutes)

This film explains the importance of local communities being prepared to face disaster, and introduces the basic concept of community based disaster management. It features messages delivered by several Indonesian celebrities and footage from CBDM activities throughout Indonesia; it is a tool that can help to motivate and empowers everyday people to take responsibility for the safety of their own communities.

Disaster Management Community Group (16 minutes)

This short drama is an engaging story that demonstrates how people in a local community worked together with their village leader, community members and other local stakeholders to establish a community group to manage disasters. The group then implements activities for community disaster preparedness and management. This film addresses some of the key questions that arise when establishing disaster management community groups in Indonesia.

Preparedness Planning (17 minutes)

This film shows examples from many different areas of Indonesia where communities are planning and preparing for possible disasters. The film helps people to better understand the basic principles of CBDM. It covers risk assessment, disaster mapping, evacuation planning, community wide disaster response practice drills, and collaboration and cooperation with key stakeholders for disaster management.

Basic Emergency First Aid Techniques (17 minutes)

This instructional video explains how to administer first response (basic first aid) in an emergency situation. The information in this video enables every-day people to save lives and respond effectively should a disaster occur.

Creator: No Strings

This educational video uses 'Puppets' to introduce the key aspects of community disaster response, produced through a collaboration between IDEP and No Strings, with support from Trocaire.

Appropriate for **children aged 9 and above and adults**. Language: **Indonesian, English, Acehnese and Tetum (multi lingual)**. Total duration: **41 minutes**. Available on **DVD or VCD**.

Contents of this DVD/VCD:

- Flood & Landslide
- Earthquake
- Tsunami
- Volcano
- Two Gardens (about peace building)
- Also includes IDEP's CBDM Manual and comic book series

A brief description of the contents on this disk

Flood and Landslide (8 minutes)

Badu has sold his hillside of 'worthless' trees to an illegal logging company. "When you're rich," he says, tossing his plastic cup and container to the ground, "you don't have to cook, and you don't have to clean up." Badu's rubbish is washed towards an already blocked drain. The water level is rising.

Earthquake (7 minutes)

It's a quiet day in Desa Wanabalu. Badu is stacking high shelves in his shop with heavy boxes - not a good idea in an earthquake zone. The Little Girl is shopping for equipment for her emergency bag- batteries, rice, first aid kit, candles and matches, mineral water and a blanket.

Tsunami (8 minutes)

Badu, a fisherman, has built his house close to the beach and chopped down the trees that would normally protect him from the sea. Suddenly, the ground shakes: an earthquake. The Little Girl moves away from the hut, crouches down and sensibly covers her head with her bucket until it's over. Then, when she looks up, she sees the water leaving the bay and sounds the alarm.

Volcano (6 minutes)

Badu is relaxing after a quiet morning's work in his little town at the foot of the volcano. Today, there is smoke coming from the summit and a rumbling noise is getting louder, but Badu has heard it all before. When the Little Girl approaches with her emergency backpack, marked with its green square and white cross, he tells her the volcano hasn't erupted in centuries, "It's perfectly safe."

Two Gardens – about peace building (10 minutes)

Taka is not what you'd call a hard worker. Taka doesn't appear to have time to work both of Dodon's gardens, so Dodon brings in Dani to clear and cultivate one of them. Dani is a newcomer to the village who doesn't speak their language well.

Let's be Friends with the Environment!

Creator: Gede Sugiartha

A series of interesting documentary films about household garden and many activities related to environment conservation and management and disaster preparedness by children and their communities.

Appropriate for **children aged 9 and above and adults**. Language: **Indonesian, English** text. Total duration: **39 minutes**. Available on **DVD or VCD**.

Contents of this DVD/VCD:

- Healthy & Nutritious Garden
- Children and their Environment in Bali
- School and Community CBDM Activities, Bali 2006
- Disaster Preparedness Training for Children

A brief description of the contents on this disk

Healthy & Nutritious Garden (5 minutes)

This short educational film gives simple instructions on the basic principles of making and maintaining home gardens that can supply households with nutritious organic vegetables. It covers the basic steps in seed potting and care, planting vegetables, and making and using liquid compost for healthy and nutritious plants. This film was made by Santi Wijaya, a 17-year-old film student living in Bali.

Children and their Environment in Bali (9 minutes)

In this short educational film a Balinese girl describes ways that young people like herself can help support their environment by doing organic gardening and household / school waste management and recycling activities. She also describes what it was like to attend a series of IDEP workshops conducted through her elementary school in Bali.

School and Community CBDM Activities, Bali 2006 (7 minutes)

This documentary film shows some of the activities implemented by IDEP Foundation's in collaboration with local Indonesian schools. These activities help teach children and their educators the basic principles of school disaster preparedness and what to do if a disaster should occur. It also shows some footage of IDEP CBDM trainers working with local communities in Bali to conduct disaster management community activities.

Disaster Preparedness Training for Children (16 minutes)

This documentary shows the basic process used for delivering the 'Tales of Disaster' educational videos in Indonesia. Facilitators from several provinces of Indonesia learn how to use puppets, games and fascinating videos to educate children about disaster preparedness. It gives an overview of how this program was launched in Indonesia in 2008 and how facilitators deliver the videos when in schools in Indonesia along with school safety drills and other education activities.

Mina and Her Village Work With the Environment

This educational film introduces important topics about waste management, water and forest conservation, and disaster preparedness to children in a fun and memorable way.

Appropriate for children aged **9 and above** and **adults**. Language: **Indonesian, English (bilingual)**. Total duration: **76 minutes**. Available on **DVD** or **VCD**.

Contents of this DVD/VCD:

- Mina's Village and the Forest
- Mina's Village & the River
- Mina's Village Says "Yes!" to Waste Management
- Mina's Village Weathers the Storm

A brief description of the contents on this disk

Mina's Village and the Forest (18 minutes)

This film teaches children and their communities about the importance of forest conservation. It tells the story of a young monkey named Lolo who is separated from his family when his forest home is destroyed by fire. Mina and her friends take care of him and replant the forest, but will Lolo be able to return to the life he once loved?

Mina's Village and the River (16 minutes)

This film teaches children and their communities about the dangers of water pollution for our health and the environment. Mina's family gets food poisoning from eating fish from a polluted river. With support from their community they improve the local environment and clean up the river.

Mina's Village Says "Yes!" to Waste Management (19 minutes)

This film teaches children and their communities about the importance of community waste management. It tells the story of Mina and her friends as they work together to improve waste management in their village. They decide to act after Mina's pet goat dies from eating a plastic bag and other children in the village get sick due to improper waste treatment.

Mina's Village Weathers the Storm (16 minutes)

This film teaches children and their communities about disaster response. While Jai is away at his parents' place, a big storm hits the village. Mina and her family evacuate to their neighbor's house, but what about Jai? In his parents' village there seems to be a lot of damage and a little girl is missing.

Creator: AIFDR

This film contains instructions of how to build and repair houses damaged by the earthquakes. By following these instructions, houses become safer places when an earthquake happens.

Appropriate for **public, construction workers** and **facilitators**. Language: **Indonesian**. Total duration: **110 minutes**. Available on **DVD**.

Contents of this DVD:

- Membangun 'Rumah Aman Gempa'
- Memperbaiki 'Rumah Aman Gempa'
- Membuat 'Rumah Aman Gempa' dengan Kayu

A brief description of the contents on this disk

Membangun 'Rumah Aman Gempa' (28 minutes)

This film contains practical instructions on how to build earthquake safe houses with the concept of an 'Earthquake Safe House.' It shows how construction begins from building the foundation, assembling the iron frame, installation of foundation beams and columns, molding, installation of bricks, to the making of roof supports.

Memperbaiki 'Rumah Aman Gempa' (45 minutes)

This film contains practical instructions to repair houses damaged by earthquakes with the concept of an 'Earthquake Safe House'. It shows ways to repair walls of large and small cracks, heavily damaged support columns, reinforcement of cracked walls and penetrating cracks, installation of a new ceiling, and roof truss reinforcement.

Membuat 'Rumah Aman Gempa' dengan Kayu (37 minutes)

This film contains practical instructions on how to build earthquake safe houses with the concept of an "Earthquake Safe House." It shows types of wood appropriate for building houses, wood processing, types of material available from houses damaged by the earthquakes, combination technique between cement and wood and how to make sure that all building elements are tied to each other.

Activity Resources for Kids

Children's Activity Book: I Know a Lot About Disasters

Author: Petra Schneider

This engaging children's activity book brings knowledge and understanding of the key principles of community based disaster preparedness and management to children in a fun and hands-on way. The book contains a series of puzzles, games and thematic coloring pages.

Appropriate for **children aged 9 and above**. Total **32 pages**. Language: **Indonesian & English**.

Children's Activity Book: Permaculture

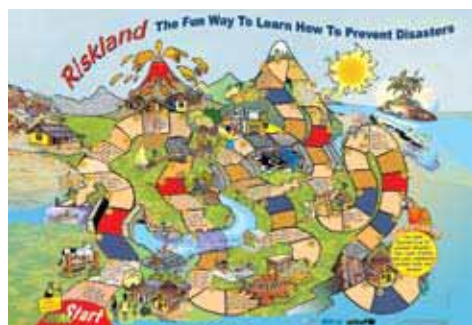

This engaging children's activity book brings knowledge and understanding of the key principles of community environmental management to children in a fun and hands-on way. The book contains a series of puzzles, games and thematic coloring pages.

Appropriate for **children aged 9 and above**. Total **32 pages**. Language: **Indonesian & English**.

Author: Petra Schneider

Riskland Education Game: The Fun Way To Learn How To Prevent Disasters

Author: UN ISDR

This engaging children's board game, developed by ISDR (the UN International Strategy for Disaster Reduction) and adapted into Indonesian by IDEP, teaches some of the key principles of community based disaster preparedness and management to children in a fun and hands-on way. The game is available in either a smaller "family size" or a permanent, weather-proof canvas, "community size", which is appropriate for distribution to schools and community education centers.

Appropriate for **children aged 9 and above**. Language: **Indonesian & English**.

Snakes & Ladders education game: We Are Prepared!

Author: Petra Schneider

This fun children's board game uses the classic snakes and ladders format to teach some of the key principles of community based disaster preparedness and management to children in a fun and hands-on way. The game is available in either a smaller "family size" or a permanent, weather-proof canvas, "community size", which is appropriate for distribution to schools and community education centers.

Appropriate for **children aged 9 and above**.
Language: **Indonesian & English**.

Snakes & Ladders educational game: Let's Be Friends With The Environment

This fun children's board game uses the classic snakes and ladders format to teach some of the key principles of community environmental management to children in a fun and hands-on way. The game is available in either a smaller "family size" or a permanent, weather-proof canvas, "community size", which is appropriate for distribution to schools and community education centers.

Appropriate for **children aged 9 and above**.
Language: **Indonesian & English**.

Author: Petra Schneider

Author: Petra Schneider

Philanthropy

Philanthropy is a children's board game which was adapted from the game monopoly. The game consists of a game board, cards, 1 set of playing pieces and dice. This game offers knowledge and understanding about the principles of philanthropy – the opposite of monopoly which is based on capitalism. Philanthropy also introduces environment management in a fun and hands-on way.

Appropriate for **children aged 9 and above**.
Language: **Indonesian & English**.
